ORGANICS RECYCLING					

Athens' "What Goes Where Guide" is your interactive zero-waste guide for correctly reusing, recycling, and composting unwanted items. Our goal is to educate customers and communities on the proper way to either recycle or dispose of unwanted materials. Together we can create a safe, healthy, and sustainable environment.

PADDED ENVELOPES (ALL PLASTIC)

 **PLASTIC BAGS & FILM >> ([HTTPS://ATHENSSERVICES-3BIN.RECYCLIST.CO/V](https://athensservices-3bin.recyclist.co/v))**

Padded envelopes that are made of all plastic are considered plastic film (/what-to-do/plastic_bags/?embeddedguide=true).

Reducing is better than recycling. When wrapping up fragile items opt for towels, sheets, or extra fabric.

Plastic film includes cellophane bags and flexible packaging. It is not ideal for

Do Not Recycle Curbside

Plastic-padded envelopes can clog recycling equipment, so keep them out of your curbside recycling bin. Recycle plastic-padded envelopes and other plastic film by taking it to a designated plastic bag drop-off location.

Remove Paper Labels Before Recycling

Before recycling, peel off or use scissors to remove any labels.

Mixed Materials Go in the Garbage

Padded envelopes made of mixed materials (e.g. paper envelopes with plastic bubble wrap inside) cannot be recycled. Toss them in the garbage.

WAYS TO REDUCE

Buy Padded Envelopes Made of Like Materials

Use bubble mailers made from all paper or all plastic instead of mixed materials that cannot be recycled.

WAYS TO REUSE
